Dear Sir:

This is in reply to your letter of March 20, 1997 in which the results of the safety inspection conducted on February 27, 1997 were stated.

Radiation surveys were not conducted at the end of each day of use in areas where radiopharmaceuticals are routinely prepared for use or administered. This was an oversight in the start-up radiation program for a new licensee. The nuclear medicine technologist initiated daily surveys when informed of the requirement by the inspector. The results of daily surveys will be reviewed by the radiation safety officer or consulting physicist. Full compliance was achieved on February 27, 1997.

Sincerely,

James D. Goettsch, D.O.
