Subject: Chem-Nuclear Name Change (Docket # 71-0231)

Hi, I'm writing to get some clarification on your letter of April 3, =
1997 concerning our request for NRC concurrence for conversion of CNSI = to a Limited Liability
Company.

In your response letter, you stated that we should submit a request to = amend our CofC's and QA
Program to reflect the new name, Chem-Nuclear =
Systems, LLC.

We would prefer not to burden your staff by requesting that our entire = fleet of cask's CofC's be changed
at one time to the new name. CNS, =
Inc. is still a legal name, and we only wanted to indicate that we would = be operating under the new
name so as to avoid any confusion on the =
NRC's part when the name begins appearing on correspondence.

We ARE currently in the process of revising our QA Program documents to = indicate the new name,
and will be sending those to you for approval = after completion. However, we request that you allow us
to request name = changes on CofC's only as a part of a normal renewal or amendment = submittal, so
as to minimize the impact of this change on your staff.

I will be traveling next week, so please send me any comments you may = have by email. We can talk
on Thursday or Friday to wrap up any loose = ends.

Thanks!
