

AMCAST
INDUSTRIAL CORPORATION

30-5794

CORPORATE CENTER

December 21, 1984

Mr. Jim Lynch
Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Lynch:

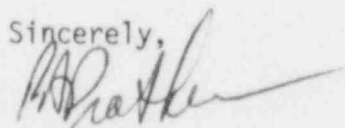

The GHR Division of Amcast Industrial Corporation has been closed. A decision has been made to remove the two Texas Nuclear Model 5183 sources under supervision of Texas Nuclear and ship to Texas Nuclear for disposal.

The tentative date for removal is January 17, 1985. We have assured that the sources are locked with the shutters in the closed position.

Should GHR be reopened, a new license application will be filed at that time.

As for the license renewal application that is pending, we ask that it be removed from consideration.

Sincerely,

R. A. Prather
Staff Engineer

SUMMARY

Re: Training of S. Howell

Asked Prather to submit training of individual. He said no formal training has been undertaken to date. He will have Howell trained by Texas Nuclear or will have another person with authorized training conduct an in house course.

I asked him to provide the following:

- 1) Name and qualifications of instructor
- 2) Course outline - including hazards, radiation protection, radiation levels around gauges, operation of gauges, lock out procedures, emergency procedures, leak test procedures, NRC rules & regulations.
- 3) duration of training program
- 4) method for determining competency

ACTION REQUIRED

I sent him a copy of nonportable gauge guide. He will submit training info for Howell (and others?)
