

DATA IS SYSTEMATICALLY DESTROYED
DURING THE TMI2 CLEANUP. "SOURCE
TERM" IS THEN BASED ON MYTH!

M. I. LEWIS
6504 BRADFORD TERR.

OFFICE OF NUCLEAR
MATERIAL SAFETY
& SAFEGUARDS,

SIRS:

MR TRAVERS STATED THAT YOU ARE
READY TO GIVE YOUR OK
TO WPUN FOR EXEMPTIONS TO
MAINTAINING RECORDS + PERFORMING
PHYSICAL INVENTORIES OF SPECIAL
NUCLEAR + BYPRODUCT MATERIAL.

MUCH INFORMATION ABOUT
THE TMI2 ACCIDENT WILL
BE DESTROYED IF THESE
EXEMPTIONS ARE ALLOWED. THE
"SOURCE TERM" DATA CONTAINED
IN THE CORE WILL BE
DESTROYED FOREVER. UNIMAGINABLE
VALUABLE PHYSICAL DATA WILL
BE IRREPLACEABLY WIPE OUT
OF EXISTENCE.

PLEASE RECONSIDER IN LIGHT
OF THE RESEARCH NEEDS ENUMERATED
IN NUREG 0956 + Review of
Modern Physics V57 APS Study of
Source Term.

Thanks, YGOL, Add: M. Siskerberg

COMMENT ON NUREG 0956

1 for granting me some time unannounced on what it turns
2 out be an awfully busy agenda. I think it will become
3 apparent when I get into this subject why it is impor-
4 tant that it not wait until December.

5 In April of this year GPU submitted a request for
6 an exemption to specific NRC regulations that cover
7 record keeping and core inventory requirements related
8 to fuel and byproduct material. Mike Masnik subse-
9 quently sent that to the panel in one of your packages
10 and in a meeting in May Tom Cochran raised the issue
11 and Bernie Snyder committed to come back to the panel
12 to discuss it before the NRC staff took action on that
13 exemption.

14 We have completed our review, a technical review
15 of that exemption request. We have done it in con-
16 junction with the Office of Nuclear Material Safety and
17 Safeguards. They are the real experts in this area.
18 We are prepared to act on the exemption favorably.
19 Before we do it I want to brief you on what went into
20 our analysis, basically what the exemption is asking of
21 us and give you a chance to interact with the staff.

22 As I mentioned in April GPU submitted a request
23 for exemption from specific NRC regulations relating to
24 maintaining records and performing physical inventories
25 of special nuclear material and byproduct material. I
