Trojan Nuclear Plant
Docket 50-344
License NPF-1

U. S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Dear Sirs:

Transmittal of Basis Document for License Change Application (LCA) 239
Debris Processing in the Fuel Building

The purpose of this letter is to formally transmit a revision to one of the basis documents for LCA 239, which requested amendment of Facility Operating (Possession Only) License No. NPF-1. LCA 239 proposed to authorize the thermal processing of spent fuel pool debris in the Fuel Building.

Attachment 1 is Scientific Ecology Group, Inc. (SEG) "Trojan Proof of Principle Test Summary" (SEG/TRJ/PRO-030, dated April 8, 1997) which reflects the addition of narrative description material related to the sample methodology, and the removal of material that was inconsistent with the Table 1 results. The changes are identified in the report by margin bars. This information is being provided to facilitate the review of LCA 239.

If there are any questions, please contact Mr. H. Ray Pate, of my staff, at (503) 556-7480.

Sincerely,

Stephen M. Quennoz
Trojan Site Executive
