Florida Power Corporation
ATTN: Mr. W. S. Wilgus
Vice President Nuclear Operations
P. O. Box 14042, M.A.C. H-2
St. Petersburg, FL 33733

Gentlemen:

SUBJECT: REPORT NO. 50-302/85-44

On November 26, 1985 - January 17, 1986, NRC inspected activities authorized by NRC Operating License No. DPR-72 for your Crystal River facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements and that other activities appeared to deviate from a commitment to the NRC. The violations and the deviation, with pertinent references and elements to be included in your response, are presented in the enclosed Notices. Due to the apparent repetitive nature of Violation 2 with that identified in NRC Inspection Report 50-302/85-41, we requested, in correspondence dated January 24, 1986, that you submit a supplemental response to that report. Therefore, no further response to this violation is required.

Your attention is invited to the unresolved item identified in the inspection report. This matter will be pursued during future inspections.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

8602190081 860212
