Baltimore, Maryland 21203

Gentlemen:

Subject: NRC Combined Inspection 50-317/85-28, 50-318/85-28

This transmits the October 1 - November 4, 1985, resident inspection findings by Messrs. T. Foley and D. Trimble at the Calvert Cliffs Nuclear Power Plant, Lusby, Maryland. Those findings were based on observation of activities, interviews, independent measurements, and document reviews, and have been discussed with Mr. Russell of your staff.

Within the scope of this inspection, no violations were observed.

To date, observations of consistent prior planning, coordination of work groups, effective communication and controlled activities characterize the well orchestrated refueling outage currently in progress. These observations may be used to characterize licensee performance in the refueling area during the future SALP assessment.

Your cooperation with us is appreciated.

Sincerely,

original signed by

Edward C. Wenzinger, Chief
Projects Branch No. 3
Division of Reactor Projects
