Vice President - Nuclear  
P. O. Box 208  
Wichita, Kansas 67201

Gentlemen:

This refers to the inspection conducted by Messrs. J. E. Cummins and B. L. Bartlett of this office during the period January 5 to 31, 1986, of activities authorized by NRC Operating License No. NPF-42 for the Wolf Creek Generating Station, and to the discussion of our findings with Mr. F. T. Rhodes and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included plant status, followup on previously identified NRC items, operational safety verification, engineered safety features system walkdown, onsite followup of events, licensee event report (LER) review, monthly maintenance observation, monthly surveillance observation, and plant tours. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to this violation, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

We have also examined actions you have taken with regard to previously identified NRC items. The status of these items is identified in paragraph 3 of the enclosed report.

The response directed by this letter and the accompanying Notices are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
