Re: Amendment Application
Michigan State University
License No. 21-00021-29
Expiration Date August 31, 1988

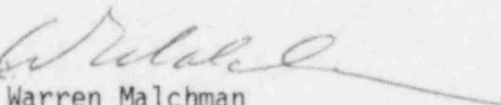

Dear Sirs:

This is an amendment application for License No. 21-00021-29. The request is to amend Section 6M of the license from an ^{241}Am possession limit of 300 mCi to a maximum possession limit of 500 mCi.

The reason for the request is that there is a need for an increased number of ^{241}Am -Be soil moisture probes that are used in conjunction with numerous research programs throughout the campus. All conditions of the current license (specifically Sections 9M and N and Condition 10a), will remain the same.

If any additional information is needed, please advise.

Sincerely,

Warren Malchman
Director
