Washington, D.C. 20555

Dear Sir or Madam:

Please find enclosed an application for renewal of Byproduct Material License # 21-18375-01.

The scope of Gamma Analysis service has not changed since the original license application November 14, 1984.

In brief, Gamma Analysis is a technical service for physicians in Michigan. Qualified technicians perform radioimmunoassays in the offices of general or specific licensees.

Only prepackaged in vitro diagnostic test kits are used (less than 10 microcuries per kit). There is no relabeling, rebottling or modification of these kits.

Please do not hesitate to contact me for any additional information.

Sincerely,

*Denise Georgiou*
