SUBJECT: RADIOACTIVE MATERIALS IN RECYCLED METALS

Please find enclosed the following information:

1. Listing of the number of NRC specific licensees by program code. The listing includes total number of NRC licensees and number of licensees in each region.
2. A booklet listing a description of each program code.

As stated in my electronic mail, Agreement States have approximately twice as many specific licensees. Therefore, the number of specific licensees in the United States is approximately three times the number included in the first enclosure. Also, each license allows possession of multiple sources and/or devices. Therefore, I cannot provide you the number of devices used in the United States.

If you have any questions, you may contact me at (301) 415-7868 or by electronic mail at JWL@NRC.GOV.

Sincerely,

John W. Lubinski, Mechanical Engineer
Sealed Source Safety Section
Medical, Academic, and Commercial
Use Safety Branch
Division of Industrial and
Medical Nuclear Safety
Office of Nuclear Material Safety
and Safeguards

Enclosures: As stated
