BOEHRINGER-INGELHEIM ANIMAL HEALTH, INC.

February 18, 1985

NRC License No. 24-12127-03

Material Licensing Branch
Division of Fuel Cycle and Material Safety
United States Nuclear Regulatory Commission
Washington, D.C.

Dear Sirs:

As Boehringer Ingelheim Animal Health, Inc.'s (formerly Philips-Roxane, Inc.) NRC Materials License is due to expire 3-31-85, we would like to request that our current license be renewed under the terms described in our previous documents. A list of these documents follows:

<u>Date</u>	<u>Description</u>
11-14-80	Application for By-product Material License to use Tritium & C ¹⁴ in Chemical Assays and possible Synthesis.
01-19-81	Replies to requests for additional information to amend License No. 24-12127-03 (Control No. 04174).
08-01-84	Notification of Corporate name change from Philips-Roxane, Inc. to Boehringer Ingelheim Animal Health, Inc.

Per a telephone conversation with your office, it appears that a Material License (24-12127-04) was granted to a Mr. Ron Tribble at Philips-Roxane in 1979 or 1980. This individual has not been employed at this location for several years and any license granted to Mr. Tribble under our corporate name should be considered obsolete and defunct.

A check for the appropriate fee for license renewal under CFR 10, Part 170, Sec. 171.12(d) in the amount of \$150.00 is enclosed. We understand that by enclosing the renewal fee and applying 30 days in advance of the expiration date, our current license will remain in effect until final action is taken on your part.
