Re: Control #77177  
Additional information

Good day, Mike

herewith is additional information, Control #77177, to resolve the survey meter calibration issue through elimination of Mercy Hospital as the storage site, details on a new storage site and individual user.

1. Storage facility - The proposed facility is the basement area of a dwelling at 1320 Pickwick Court, Naperville, Illinois 60540, owned by Rohit Trivedi. When the source is in the closed position the exposure rate at 6" is 13 mR/hr. The nearest occupiable area is on the floor above, 8' from the source. Hence, the estimated dose will be .05 mR/hr. This yields a weekly dose of 8.4 mR/hr., well below NCRP levels for public non-controlled areas. When in use the beam will be directed toward a basement wall with earth behind it. The source will only be accessible to two individuals with keys. (Facility drawing attached). When not in use the source will be stored in a locked box.
2. Individual users - For purposes of calibrations, only the writer and Rohit Trivedi (resume attached) will have keys. Further, we request that Mr. Trivedi be added to those listed in our license to perform wire testing.

All other elements of the program are as stated in communications of 19 March 1982, 24 August 1982, 7 February 1983 and 19 October 1984.

Thank you , in advance, for your cooperation.

Sincerely,

*Randy Dielman*
