Subject: IMPEP Review and Report

I'd like to suggest a change to the 3rd paragraph of Section 1.0, "Introduction." I believe it is more accurate to say that:

"The Office of Air Quality and Radiation Protection, within the Louisiana Department of Environmental Quality, is the agency that regulates environmental radiation issues and radiation hazards. The Secretary of the department is appointed by, and reports directly to, the Governor. Within the Office of Air Quality and Radiation Protection, headed by an Assistant Secretary who is also appointed by the governor and who reports to the secretary, the Radiation Protection Division (RPD) administers the state's radiation protection program. The RPD organizational chart....."

Let me know if you need any clarification of this. It should also be reflected in the department's organizational chart.

I am rather disappointed that the final answers to the questionnaire, which I formatted so carefully, was returned to us in a very sloppy condition. Don't let it happen again! <GRIN> I'll provide you another if you need it. FYI, I used 1" margins top, bottom and sides, Times New Roman font, 12 point. I do not know if my final version or an interim version was used, which could account for the way it came out.

As I run across them, I'm going to send you stuff via e-mail which will not appear in the Secretary's reply.
