

April 11, 1997

Daniel B. Barnes, President
Brucker Earth Engineering & Testing
8706 Manchester Road
St. Louis, MO 63144-2724

Dear Mr. Barnes:

SUBJECT: NRC INSPECTION REPORT NO. 030-33413/97001

This refers to the inspection conducted on March 31, 1997, at the Brentwood Blvd. facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with your radiation safety officer, Richard Evans.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements and observation of activities in progress.

In addition to the above areas, the inspector examined actions described in your letter dated March 20, 1995, regarding apparent violations found during our January 9, 1995, inspection. We have no further questions regarding these matters.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practices," a copy of this letter will be placed in the NRC Public Document Room (PDR).

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original signed by G. L. Shear for
Roy J. Caniano, Acting Director
Division of Nuclear Materials Safety
