Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Licensing
United States Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Sections 6.5.2.2 and 6.5.2.3.

This application provides the requested changes, safety evaluation and significant hazard consideration. The proposed changes to Section 6.5.2.2 delineates the Company Nuclear Review Board (CNRB) membership qualifications and modifies the CNRB composition. Under "Alternates", Section 6.5.2.3, the phrase "to serve on a temporary basis" is deleted.

Toledo Edison requests that this amendment request be granted by December 31, 1985. However, the composition of the CNRB will remain consistent with the existing Technical Specifications until approval is granted.

Enclosed is a check for \$150 as required by 10CFR170.12(C) for a license amendment application.

Very truly yours,

JW:GAB:lah
