

SEP 9 1985

Pogue Industries Incorporated
ATTN: Steven W. Pogue
President
4961 Caribee Drive
St. Louis, MO 63128

Gentlemen:

Enclosed is your NRC License Number 24-24541-01 in accordance with your request.

Please note that the Gamma Industries Model T-4 sealed source assembly has not been authorized in your license. According to our files the Gamma Industries Model T-4 sealed source assembly is not compatible with the Technical Operations Model 533 exposure device as requested in your application dated July 18, 1985. Also, note that authorization for cobalt-60 has not been given in accordance to our telephone conference held on September 4, 1985.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

REG3 LIC30
24-24541-01 PDR

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

SUBJECT

Co-60 (100 Curies + 50 Curies)

SUMMARY

Mr. Pogue stated that they would not be purchasing or using Cobalt 60 at current time. Temporary job sites would entail the use of Ir-192 only.

It was suggested to Mr. Pogue that authorization for 100 curies + 50 curies of Co-60 be given to his Co. at the time of amendment for his permanent fixed facility. At present his temp. job site license did not need authorization for such high activity of Co-60.

Mr. Pogue was in agreement with this point and stated he would amend the license to possess Co-60 at the time he would amend for a fixed facility.

ACTION REQUIRED

N/A License # 24-24541-01 authorized for Ir-192 only
