

JOE WILLIAMS, JR.  
Senior Vice President—Nuclear  
(419) 249-2300  
(419) 249-5223

Docket No. 50-346  
License No. NPF-3  
Serial No. 1215  
December 5, 1985

Director of Nuclear Reactor Regulation  
Attention: Mr. John F. Stolz  
Operating Reactor Branch No. 4  
Division of Licensing  
United States Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Sections 6.5.1.7.c, 6.5.1.8, 6.5.2.9, 6.5.2.10, 6.7.1.c and 6.7.1.d.

The attachment provides the proposed change, its safety evaluation and significant hazard consideration. The proposed change revises the Technical Specification that requires the Company Nuclear Review Board (CNRB) report to and advise the President and Chief Operating Officer. Under the proposed change the CNRB would report to and advise the Senior Vice President, Nuclear. This results from the restructuring of the CNRB and recent corporate reorganization.

This amendment reflects an administrative organizational change already in place at Toledo Edison and, therefore, requests that this amendment be granted by December 31, 1985. This amendment request is a revision to our submittal dated July 26, 1985 (Serial No. 1170) and incorporates a revised significant hazard consideration per your request dated November 4, 1985 (Log No. 1854). Therefore, no fee is required for this submittal.

Very truly yours,

JW:GAB:lah
