Geology

Dear Mr. Noonan:

This letter provides follow-up information to a previous submittal sent to your office on October 31, 1985 (ST-HL-AE-1499). During a meeting with Bechtel, NRC, Harding Lawson Associates (HLA) and Houston Lighting & Power (HL&P) on October 23, 1985, HL&P agreed to provide additional information (see Attachment 1) regarding the geology issues discussed in Section 2.5 of the Draft Safety Evaluation Report.

Attachment 2 addresses item #7 of the information requested by NRC. This attachment provides a consolidated contour map of the structures identified in the HLA report "Interpretation of Geophysical Data-South Texas Project - October 30, 1985."

In regards to item #9 of Attachment 1, HL&P plans to incorporate the geotechnical monitoring for the STP plant site as part of the normal plant operating procedures. The procedures for monitoring the north portion of the Main Cooling Reservoir will be implemented similarly. The procedures will be structured such that appropriate administrative personnel are kept informed of the monitoring status.
