Mr. Michael F. Webber, Chief
U.S. Nuclear Regulatory Commission
Low-Level Waste and Decommissioning Projects Branch
Division of Waste Management
Office of Nuclear Material Safety and Safeguards
Washington, D.C. 20555-0001

Dear Mr. Webber:

This is in response to letters from the Nuclear Regulatory Commission dated October 24, 1995 and March 5, 1996 inviting our participation in the Environmental Impact Statement (EIS) process on the remediation of the Sequoyah Fuels Corporation facility near Gore, Oklahoma. Yes, we would like to participate in the process. Details of the nature of our participation can be discussed at a later date. We will require funding for any manpower and resources we commit to EIS activities in which we do participate. It would be helpful if you would forward any information available pertaining to functions in the process in which our participation is needed.

We look forward to this opportunity to work with the Nuclear Regulatory Commission and to help produce a quality EIS for the remediation of the Sequoyah Fuels Corporation facility.

Sincerely,

Kathy D. Peter
District Chief
