DEC 2 1985

Docket No. 50-10, 50-237, 50-249;
50-254, 50-265; 50-373, 50-374

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

The NRC's Office for Analysis and Evaluation of Operational Data (AEOD) has recently completed an assessment of 39 Dresden, 21 Quad Cities and 30 LaSalle Licensee Event Reports (LERs) as part of the NRC's Systematic Appraisal of Licensee Performance (SALP). The LERs were found to be of barely acceptable quality for Dresden, of acceptable quality for Quad Cities and of above average quality for LaSalle based on the requirements of 10 CFR 50.73 and when compared to other facilities that have been evaluated using the same methodology.

We are providing a copy of AEOD's assessment before we issue the SALP 5 reports so that you might be aware of these diverse findings between sites and take action to improve the overall quality of future LERs.

We request that you provide Region III with the actions you intend to take to improve the overall quality of future LERs.

We appreciate your cooperation with us in this matter. If you have any questions, please contact N. Chrissotimos (790-5716).

Sincerely,
"Original Signed by E.G. Greenman"

Charles E. Norelius, Director
Division of Reactor Projects
