AFFIDAVIT OF BILLY J. CLACK  
ON CONTENTION EP-2/EP-2(a)

COUNTY OF FULTON )  
 )  
STATE OF GEORGIA )

I, Billy J. Clack, being duly sworn according to law, depose and say as follows:

1. My name is Billy J. Clack. I am the Executive Director of the Georgia Emergency Management Agency. My business address is P.O. Box 18055, Atlanta, Georgia 30316. A summary of my professional qualifications is attached to this affidavit as Exhibit A.

2. The purpose of this affidavit is to support "Applicants' Motion For Summary Disposition of Joint Intervenor's Contention EP-2/EP-2(a)," which concerns the existence of administrative controls over use of the Emergency Notification

Network ("ENN"). I have personal knowledge of the matters set forth herein and believe them to be true and correct.

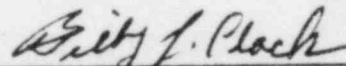

3. The State of Georgia will have three ENN terminals -- one in the Communications Center of Georgia Emergency Management Agency ("GEMA") headquarters in Atlanta; one in the State Emergency Operations Center ("EOC"); and one in the State Forward Emergency Operations Center ("FEOC"), which will be located in the new Burke County EOC Building in Waynesboro, Georgia.

4. Because the GEMA Communications Center is staffed 24 hours per day, physical access to the ENN terminal in the Communications Center will be restricted. The ENN terminal for the State EOC will be kept in a locked cabinet in the EOC until the terminal is activated when the EOC is activated at the time of an emergency. Further, because physical access to the EOC would be restricted during an emergency, physical access to the ENN would also be restricted. Finally, the ENN terminal for the State FEOC would be kept in a locked cabinet in the FEOC until the terminal is activated when the FEOC is activated at the time of an emergency. During an emergency, physical access to the FEOC would be restricted; thus, physical access to the ENN terminal would also be restricted.

5. In addition, all of the State of Georgia's ENN terminals will be subject to strict administrative controls. By

procedure, use of the ENN will be limited to the transmission of official and necessary messages, such as information about the date and time of an incident, the class of emergency, whether a release is taking place, the type of actual or projected release and estimated duration/impact times, estimates of quantity, points and heights of radioactive release, the chemical and physical form of release, meteorological conditions, actual or projected dose rates and integrated doses, estimates of any surface radioactive contamination, emergency response actions underway, potentially affected populations and areas, any recommended emergency actions (including protective measures), requests for any needed onsite support by offsite organizations, and the prognosis for the event based on plant information.

6. In summary, Georgia's ENN terminals will be both physically and administratively controlled. The physical controls will prevent unauthorized access to the ENN. The administrative controls will assure its ready availability during an emergency for the transmission of official and necessary messages.
