To Whom It May Concern,

This letter is to fulfill our obligation to report a lost instrument as stated in the Operations Manual of our X-Ray Fluorescence Analyzer Model 100 (also known as a model 8620), Serial Number 1233. This laboratory instrument is manufactured by Asoma Instruments of Austin, Texas.

We had shipped our instrument out for printer repair to Asoma Instruments in Austin on February 18, 1997 by Airborne Express. As of this date, Airborne has not been able to find the package. We are in the process of filing a lost claim form with Airborne. If we hear that that the instrument has been recovered, we will let you know.

I can be reached at the address and phone below if you need further information.

Sincerely,

James B. Troll
