

Docket No. 50-346

License No. NFP-3

Serial No. 1254

March 6, 1986

JOE WILLIAMS, JR.
Senior Vice President—Nuclear
(419) 249-2300
(419) 249-5223

Mr. John F. Stolz, Director
PWR Project Directorate No. 6
Division of PWR Licensing-B
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Stolz:

Enclosed please find Revision 7 to the Davis-Besse Nuclear Power Station Unit No. 1 Fire Hazards Analysis Report (FHAR). Revision 7 incorporates several substantial changes as described below and will replace Revision 6 (Serial No. 617) in its entirety.

1. Additional fire areas were created and several were redefined to support the current Appendix R analysis identified in the Appendix R Compliance Assessment Report (CAR) Revision 1.
2. Safe Shutdown portions previously discussed in the FHAR have been removed and are now detailed in the CAR.
3. Completed/Proposed modifications since Revision 6 that affect the FHAR have been incorporated in Revision 7.

We will be available for discussion of the revised FHAR at your convenience.

Very truly yours,

Joe Williams, Jr.
JW:TJB:plf
