Attn: Mr. James H. Wilson

Subject: Commercial Light Water Reactor Lead Test Assembly (LTA) Report - Response
to NRC Request for Additional Information

Dear Mr. Wilson:

In accordance with the agreement with the Nuclear Regulatory Commission (NRC), enclosed find final revised responses to the reactor systems, materials and chemical engineering and safeguards and security request for additional information (RAI) received from the NRC with their letters of January 3, 1997 and January 13, 1997. The RAI was further discussed with the NRC in a meeting held on January 22, 1997 and two additional requests from that meeting are also addressed by this response.

This revised response replaces the one transmitted to you by letter dated February 7, 1997. This revised response reflects the content of the classified technical report, PNNL-TTQP-6-503, Rev. 1 transmitted on March 3, and the unclassified technical report, PNNL-11419, Rev. 1 transmitted under separate cover.

If you have any questions, please call Max Clausen at 586-8217 or Richard Latorre at 586-4246.

Sincerely,

Stephen M. Sohinki
