Dear Charlie,

Please find enclosed a copy of our "expert system" TRANAID which has been specifically designed against the IAEA Regulations 1985 (as amended 1990), Safety Series No 6.

As the USA has now essentially adopted this version of SS6, I thought you might find it a useful tool. Naturally, this system is not designed to replace the "expert" but rather to assist in making the complex calculations and decisions which are required for the transport of Radioactive Materials.

The copy sent to you is entirely free but I would ask that you do not network it throughout your organisation. Additional copies are of course available through myself or Malcolm Critchley at the above address should any of your operations personnel or people from the utilities require it.

The cost to them would be \$450 U.S. I will be sending free copies to Rick Boyle and Mike Keane as well.

On a personal note, I hope you are keeping well. It seems a long time since we last met up in Washington at the NEI Conference. Maybe we'll meet at PATRAM next year if you're coming over.

Best Regards

G.H. Slawson
Safety, Health & Environment Manager.
