Subject: 10CFR32.26 Distribution License Application

Gentlemen:

In order not to loose business, we need our distribution license without delay.

We appreciate that, as we were informed on the phone, your backlog at this time has lengthened your response time. However, being our case almost a matter of course, since we are applying for a license to distribute exempt product which involves minute global quantities of NRC approved "sealed sources" and which we handle with the noted responsibility of our Company and the experience handed down by the former manufacturer of the item (who, of course, was licensed by USNRC), and being that we already waited our turn in line at the time of our original submittal (November 1984) and the submittal of last August was made to add materials requested to complete your evaluation, we respectfully request that your evaluation be completed and the consequent license be issued, or that we be permitted to start shipping product manufactured under current North Carolina State Regulatory License.

Trusting that you will find our request reasonable, we look forward to receiving favorable disposition of the same, by return mail.

Thank you for your attention to this matter.

Yours truly,
SCOVILL INCORPORATED
