TELEPHONE MINUTES

8/7/85

TO: L. R. Jacobi		CORRESPONDENCE SERIAL NUMBER	
FROM: M. E. Powell <i>HL&P</i>		ST-HL-19067	
DATE OF CALL: May 8, 1981		SUBJECT FILE NUMBERS	
SUBJECT: Potential Reportable Items		PRIMARY: V-0530 SECONDARY:	
TELECON PARTICIPANTS: (INCLUDE NAME AND ORGANIZATION OF EACH)		PAGE 1 OF 2	
W. A. Crossman (USBRANCH)			
M. E. Powell (HL&P)			

I called Mr. Crossman to inform the NRC that HL&P would like to report three(3) items as being potentially reportable pursuant to 10CFR50.55(e).

These items are as follows:

(1) Certain faulted condition heat loads may not have been considered in the design of portions of the HVAC system which are designated as safety related.

(2) Concerning computer program (code) verification - that the verification program lacks visibility to the user whether or not the program versions in use have been verified.

I informed Mr. Crossman that B&R has completed a review of 13 out of 23 computer programs (codes) and the 13 are satisfactory.

(3) Concerning shielding analysis - that certain shielding calculations affecting safety related considerations may not have been verified consistent with the requirements for verification of safety-related calculations.
