Dear Mr. Denton:

Transmitted herewith are three (3) originals and fifteen (15) copies of the Inservice Inspection Program Plan for Wolf Creek Generating Station for NRC review and approval. This submittal in conjunction with Reference 1 which transmitted the Inservice Testing Program for Pumps and Valves satisfies condition 2.C.(9) of the Wolf Creek Generating Station, Unit 1 Operating License NPF-42.

The ISI program meets the requirements of Section XI of ASME Boiler and Pressure Vessel Code, 1980 Edition through Winter 1981 Addenda except specific relief requests which are being submitted pursuant to 10 CFR 50.55a(g)(6)(i) via Reference 2. Some portions of the program plan exceed ASME Code requirements and at the option of the owner may be changed in the future.

Application fees concerning this submittal are being transmitted under separate cover. If there are any questions concerning this submittal, please contact myself or Mr. O.L. Maynard of my staff.

Very truly yours,

*Glenn L. Koester*
