Subject: License #24-01570-03, Control #77392

Dear Ms. Vacherlon:

We have received your deemed timely letter dated September 7, 1984, regarding the St. Luke's renewal application dated August 20, 1984. . Since the date of our application, the east facility at 5535 Delmar Boulevard has been sold to the Charter Medical Corporation, and this facility will now be known as Charter Hospital of St. Louis, Inc.

Diagnostic Imaging Associates, Ltd., will continue to provide radiology services at the east facility for the new owners as it had for St. Luke's previously. The licensed users on the St. Luke's license are: Sumner Holtz, M.D., Thomas F. Egan, M.D., and Naris Rujanavech, M.D., and these three users will continue to supervise the nuclear medicine program for the new Charter group. Michael M. Ter-Pogossian, Ph.D., consultant physicist, will be the radiation safety officer for the new organization, as for St. Luke's Hospitals. The same Radiation Safety Committee and the same Medical Isotope's Committee will continue to serve both hospitals. No changes in personnel are contemplated at this time, and all the established rules for the use of nuclear materials and safety will be followed in both hospitals.

Please direct all communications concerning license activities to the St. Luke's West Hospital, 232 So. Woods Mill Road, Chesterfield, Missouri 63017, to the attention of the Radiation Safety Committee.

Sincerely,

Thomas F. Egan M.D.
Thomas F. Egan, M.D.
Chairman, Radiation Safety Committee
