Mr. W. T. Crow, Acting Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety, NMSS
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Crow:

Subject: License No. SUB-526
Docket No. 40-3392

In accordance with license condition No. 20 of License SUB-526, as renewed May 28, 1985, we have enclosed the required report. The report details operational modifications and actions completed, or nearing completion, which will significantly reduce the probability of a massive UF₆ release during movement of hot UF₆ product cylinders. Additional measures are specified which effectively eliminate the risk that the crane operator might be unable to escape during a massive UF₆ release.

If you have any questions regarding these modifications, please call me, or M. D. Kosmider or R. W. Yates at our Plant.

Sincerely,

A. J. Cipolla

A. J. Cipolla
