U. S. Nuclear Regulatory Commission
Material Licensing Branch
Division of Fuel Cycle and Material Safety
Washington, D.C. 20555

U.S. N.R.C.
LIC. FEE MGMT. BRANCH

Dear Sir:

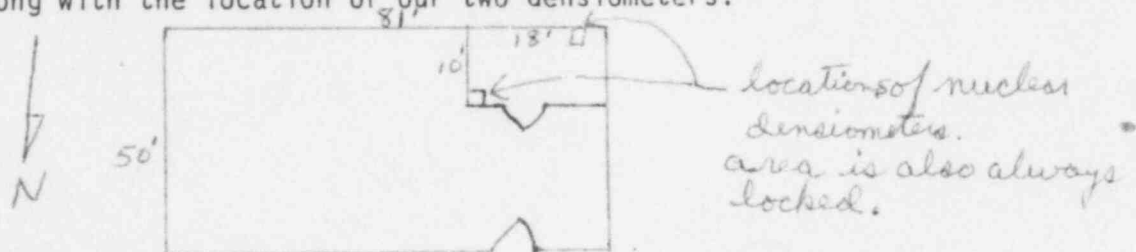

We would like to amend our License No. 25-15247-01 to read:

Individuals who will use or directly supervise the use of licensed materials are:
Dale Clark, Mike Murray and John Almon.

We would also like to add Bruce Brannon, Larry Mogstad and Rene Barton. Larry Mogstad and Rene Barton have both been to the Troxler School and have certificates from said course. They both have worked under my supervision in regards to the use of the nuclear densiometer. Bruce Brannon hasn't had a great deal of experience with the nuclear densiometer but has been working under my supervision with the machine.

All of said people have been briefed as to the safety and use of the nuclear densiometers. In case of an accident, they have been briefed as to the procedures for notifying the proper authorities.

✓ As per License Condition No. 17, we have moved the nuclear densiometers to a different storage area. The new storage area is in our Heavy Duty Shop. The address of said shop is at 14th Street and 12th Avenue North. The following is a sketch of the building along with the location of our two densiometers:

If you have any further questions, please contact me at this office.

Sincerely,

Dale A. Clark
