Ref: License No. 20-14082-02

Gentlemen:

Please be advised that those activities of Interex Corp. covered by the above referenced license have been purchased by Waste Management Inc., an Oak Brook, Illinois based company listed on the New York stock exchange. The laboratory, radiation measurement facility and chemical waste operation is now called Chemical Waste Management of Massachusetts Inc.

The laboratory and radiation measurement facility will continue to operate at the same location with the same personnel for the immediate future. It is anticipated that the laboratory and radiation measurement facility will move to a building next to the present one in a few months.

The Health Physics Program submitted for license renewal will continue to be implemented except that Dr. Richard C. Fix will assume the roll of RSO and will also be responsible for records management. His resume was included in the renewal application. In addition, film badges will be replaced by TLD's as supplied by R. S. Landauer. The frequency of change will be quarterly based on a review of the frequency of isotope use and the lack of measureable doses received by personnel in the past.

A revised Health Physics Program will be submitted for review once the specifics of the new facility have been established.

We will be happy to supply any additional information required to keep the present license in force.

Very Truly Yours,

Richard C. Fix
