New Haven, Ct. 06511

July 26, 1985

Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, Pa. 19406

Gentlemen:

Subject: Amendment to Nuclear Regulatory Commission  
License No. 06-00183-03

This is a request to amend the Yale University Broad License to include the calibration of routine survey instruments for institutions with associations with Yale University, and for individuals with associations with Yale University or affiliated institutions. The service will be provided as a professional courtesy to the institutions or individuals. No direct fee will be charged for this service and, therefore, "non-profit" should be considered.

The following is one such example, but not limited to this situation exclusively:

Yale-New Haven Hospital is a back-up medical facility for several Connecticut nuclear power plants and maintains emergency instruments for monitoring purposes. Due to the proximity and expertise available at the Yale University Health Physics Division, it is more convenient for Yale University, under Nuclear Regulatory Commission License No. 06-00183-03, to conduct calibrations than for Yale-New Haven Hospital or Northeast Utilities to do so.

We are, therefore, applying for the provision to calibrate instruments for other institutions based on professional courtesy when the service is realistic and convenient to Yale University Health Physics Division personnel.

Very truly yours,

*George R. Holeman*  
George R. Holeman, Director  
Health Physics Division
