Subject: NRC Control No. 103839

Dear Mr. Glenn:

Reference BSI's recent application for amendment to byproduct material license No. 37-21292-01, NRC Control No. 103839. As noted in our letter dated 15 May 1985, the owner of the sources in question, the Bureau of Mines, also amended their license to include these sources. The Bureau recently received certificates of registration from the NRC for these devices. Copies of these certificates are submitted for your information while reviewing our application. Should you have any questions or comments, please contact the METF Radiation Protection Officer, Larry Miller, at (412) 675-6731.

Sincerely,
