

OCT 24 1985

Mrs. Eleanor Busick, Acting Director
Office of Nuclear Export/Import Control
Bureau of Oceans and International
Environmental & Scientific Affairs
U.S. Department of State, Room 4327A
Washington, D.C. 20520

Dear Mrs. Busick:

Enclosed please find an amended application for XCOM0993 from General Electric Company. The original request, which was forwarded to you for review on September 11, 1985, involves the export of one linde 3-channel gas blender to Taiwan's Institute of Nuclear Energy Research (INER) where it will be used as part of a program in researching alternate methods of processing UO2 powder. By this amended application, General Electric is requesting that one Hazen-Quinn laboratory rotary bench kiln, valued at \$15,000, be added to the original request for the same end use. Accordingly, the total value of the equipment to be exported will be increased to \$20,000.

We would appreciate your views, in accordance with established procedures, as to whether the additional proposed export also meets the applicable criteria in the Atomic Energy Act as amended by the Nuclear Nonproliferation Act of 1978.

Sincerely,

Original signed by: Marvin R. Peterson

Marvin R. Peterson, Acting Assistant
Director
Export/Import and International Safeguards
Office of International Programs
