

**Florida  
Power**  
CORPORATION

Walter S. Wilgus  
Vice President  
Nuclear Operations

October 29, 1985

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation

Dear Mr. Denton:

As an add-on to our excellent, informal discussion of Thursday, October 10, 1985, I am enclosing a letter which addresses specifically the actions we, at Florida Power Corporation, have taken, and are continuing in our pursuit of excellence in plant safety and operation. I hope that the brief synopsis included in the attachment, will demonstrate to you our concern and dedication to safe reactor operation.

I sincerely appreciate the time that you were able to give me and the stimulating conversation that we had. Through this enclosure, I hope to better illustrate some of my brief descriptions of our aggressive activities in the area of Emergency Feedwater System Reliability.

Very truly yours,

  
W. S. Wilgus
