Ketchikan, Alaska 99901

Attention: Mr. Edwin Johnson
Vice President

Gentlemen:

Thank you for your letter dated November 18, 1985, informing us of the steps you have taken to correct the items which we brought to your attention in our letter dated October 1, 1985.

Your response has been determined to be incomplete in that no information was provided to describe in detail the specific actions which you are going to take to establish effective management control of the radiation safety program as requested in our letter. In order to establish effective overall administrative control of the Radiation Safety Program, you should periodically review the actions taken by your Radiation Safety Officer to ensure continuing compliance with NRC license requirements.

Therefore, you are required to resubmit to this office additional information which describes in detail how you plan to implement your management control system in preventing violations of NRC regulations. Your response must be submitted within 30 days of the date of this letter. If you have any questions on this matter, we will be glad to discuss them with you.

Your cooperation with us is appreciated.

Sincerely,

151

James L. Montgomery, Chief
Nuclear Materials Safety and
Safeguards Branch
