Dear Mr. Wright:

Hazleton Laboratories America, Inc. (HLA-NRC License #45-23032-02/Expiration 5-31-89) requests an amendment to the afore noted license to allow the possession of 1 millicurie of Technetium - 99 metastable and 1 millicurie of Technetium - 99. This request is prompted by research and development needs in our laboratories for acute and subacute metabolism toxicity data in the rat. Neither Tc 99 nor Tc 99-m will be used in vivo human studies. Enclosed please find the required fee in anticipation of approval.

Sincerely,

TIMOTHY F. BLAUVELT
Radiation Protection Officer
