Post Office Box 351
Fredericktown, Missouri

Subject: APPLICATION FOR BYPRODUCT MATERIAL LICENSE

Dear Mr. Slavens:

Reference is made to your application for Cobalt 60 sealed sources for use in Instruments, Incorporated liquid level gauges.

In order to continue review of your application, we would like to have the make and model number of each source which you have in your possession and the make and model number of the devices in which the sources are used.

On Authorization No. 28146, Mr. C. E. Atwell was listed as individual user of the sources. We do not have any record of the individuals named as individual users on this application. We would like to have a more complete discussion of the type of training received in the use of these sources and under whom this training was received.

It will aid us in our review if you will present a detailed discussion of the procedures which you follow in handling the sources. A description of the areas in which the sources are used and the make and model number of your instruments and detectors will provide us with more information on your program. A complete description of your storage facilities should also be present with the other information.

Upon receipt of the information we have requested, we shall continue our review of your application.

Very truly yours,

D. W. HITCH, Assistant Chief
Byproduct Licensing
Isotope Division
