

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

October 8, 1985

Docket Nos. 50-250  
and 50-251

LICENSEE: Florida Power and Light Company (FPL)  
FACILITIES: Turkey Point Plant Units 3 and 4  
SUBJECT: SUMMARY OF MEETING HELD ON JULY 25, 1985 TO DISCUSS  
INTEGRATED LIVING SCHEDULES

BACKGROUND:

An initial meeting was held with Florida Power and Light Company (FPL) on June 22, 1984, as detailed in the Meeting Summary dated July 2, 1984. Subsequent to the meeting, FPL responded to Generic Letter 85-07, "Implementation of Integrated Schedules for Plant Modifications", dated May 2, 1985. The FPL response, dated June 24, 1985, provided their views on Integrated Living Schedules (ILS) as requested by the Generic Letter. A meeting was requested by FPL to provide additional details on their ILS development and discuss the overall effort.

MEETING SUMMARY:

The meeting was opened with introductions of the participants. A copy of the list of attendees is included as Enclosure 1. Mr. Jerry Burford provided a summary of FPL's activities related to development of and ILS for Turkey Point Plant Units 3 and 4 as outlined in Enclosure 2. Discussions followed relating to ILS in terms of Commission policy, rule making, acceptance criteria and methodology. The staff addressed the items and indicated the Commission policy is the same as indicated in Generic Letter 83-20, dated May 7, 1984. The staff further indicated they were in the process of assessing the responses to Generic Letter 85-07, dated May 2, 1985.

FPL indicated they will host an industry conference on October 23 through 25, 1985 in West Palm Beach, Florida, and requested NRC participation. The staff indicated their interest and would pursue the request with the appropriate management.

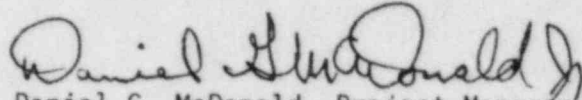

The staff reaffirmed that considerable benefits could be gained by both the regulators and industry if joint good faith efforts could be made in the area of ILS. Participation in the upcoming industry conference would be a

viable focal point for responding to industry's concerns relating to the establishment and implementing of plant specific ILS. FPL will follow up with a written request for NRC participation in the upcoming conference.

Sincerely,

A handwritten signature in dark ink, appearing to read "Daniel G. McDonald". The signature is fluid and cursive, with the first and last names being more prominent.
