1831 Olive Street  
St. Louis, Missouri

Attention: Mr. Jim Maerli, Buyer

Gentlemen:

This will acknowledge receipt of your application for renewal of your  
Source Material License No. D-742.

Section 40.22 (a)(4), Title 10, Code of Federal Regulations, Part 40,  
effective February 13, 1961, copy enclosed, establishes a general  
license authorizing certain persons to use and transfer up to 15  
pounds of source material at any one time provided they do not receive  
more than 150 pounds during a single calendar year pursuant to this general  
license. As provided by Section 40.20, a general license is effective  
without the filing of an application with the Commission or the issuance  
of licensing documents to particular persons. If your proposed require-  
ments and use of source material are within the purview of the general  
license provisions, you would not require a specific AEC license for pos-  
session and use of this source material. Please note, however, that the  
general license is issued to the corporate entity rather than to divisions  
or other subunits of the corporate entity.

Very truly yours,

Donald A. Nussbaumer, Chief  
Source & Special Nuclear Materials Branch  
Division of Licensing and Regulation

Enclosure:  
10 CFR 40
