U. S. Atomic Energy Commission
Washington 25, D.C.

Gentlemen:

I am making by copy of this letter an application for amendment of the Monsanto Chemical Company License No. 24-1113-7. I request that this amendment consist of the addition of my name as an individual user.

My training and experience in the handling of radioactivity was obtained at the Argonne Hospital in Chicago, Illinois. This hospital was run by the University of Chicago for the Argonne National Laboratory. I routinely handled up to three millicuries of P-32.

I was trained in radiation protection, monitoring techniques, and calculations basic to the use and measurement of radioactivity by my immediate superior, Dr. Eugene Goldwasser. I was employed by him for over a year.

Sincerely yours,

Mark Nugent
