Mr. James R. Mason, Chief
Isotope Branch
Division of Licensing & Regulations
United States Atomic Energy Commission
1717 - 8th Street NW
Washington 25, D. C.

Dear Mr. Mason:

This is in reference to your letter of July 9 asking for a report on our compliance of your requests by the number of the items you have shown.

Item 1 - has been corrected by the fact that we have had an amendment made to our License No. 24-3091-issued May 13, 1958.

Item 2 - quantities of radioactivity in unrestricted areas near the lead storage shields containing Cobalt 60 sources have been assitionally shielded as per your representative's, Mr. Jack T. Southerland, request.

Item 3 - autoclaves located in the clave bay of the Process Building have been labeled with the proper labels you have requested.

The cobalt 60 sources stored in unrestricted areas at the time of Mr. Southerland's visit are now contained in an underground concrete locked vault.

Respectfully yours,

R. W. Slavens
Electrical Supervisor
