

DEC 17 1985

Docket No. 50-271

Vermont Yankee Nuclear Power Corporation
ATTN: Mr. Warren P. Murphy
Vice President and Manager
of Operations
RD 5, Box 169
Ferry Road
Brattleboro, Vermont 05301

Gentlemen:

Subject: Inspection Report No. 50-271/85-39

A special safety inspection of your radiation protection and solid radioactive waste programs during the extended outage was conducted by Mr. H. Bicehouse of this office on December 2-6, 1985. Our findings were discussed with Mr. J. Pelletier of your staff at the conclusion of the inspection on December 6, 1985.

Areas of the radiation protection and solid radioactive waste programs examined during the inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations and measurements made by the inspector.

Within the scope of this inspection, no violations or deviations were observed.

We have reviewed the actions taken to correct the violations brought to your attention in the enclosure to our letter, dated October 22, 1985. The corrective actions stated in your letter, dated November 25, 1985, appear to be adequate to prevent recurrence. Since certain corrective actions will not be completed until after the current outage, we have identified those actions as items for subsequent review.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,
Original Signed By:
