MAY 10 1961

National Lead Company
P. O. Box 351
Fredericktown, Missouri

Attention: Mr. E. A. Burke

Gentlemen:

Reference is made to your letter dated April 26, 1961, regarding Authorization No. 21459 and Cobalt 60 sealed sources used in liquid level gauges in the Metals Refinery, Fredericktown, Missouri.

Our records indicate that Authorization No. 21459 was superseded by Authorization No. 28146 issued August 28, 1954, and this, in turn, by License No. 24-3090-1, which is your current authority for possession of this material.

National Lead Company, as the legal licensee named in License No. 24-3090-1 is responsible for the disposition of the sources.

If it is desired to continue this use of the sources, G.E.A. or the person taking up the lease from G.E.A. should make immediate application for a license to authorize such possession and use. Alternatively, National Lead Company, may (1) request amendment of its license to authorize storage of the sources at some place under the control of the Company, (2) transfer the sources to an authorized (properly licensed) recipient; or (3) dispose of them in compliance with Section 28.701, 10 CFR 28.

You are requested to notify this office promptly of the alternative chosen. If the sources are transferred or disposed of, advise us of the date of such action and request termination of License No. 24-3090-1.

Sincerely yours,

Very Respectfully,
WBC: Compliance, (WBC)
