Division of Licenses & Regulations
Washington 25, D.C.

Dear Sir:

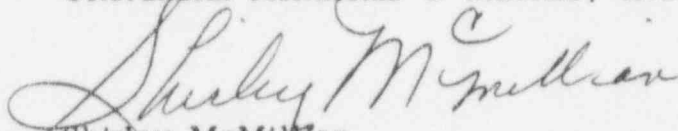

After a recent discussion with Mr. Harold Krueger, representative of National Lead Company, Fredericktown, Missouri it was agreed that if possible the licenses now held by National Lead Company for the storage of "Cobalt 60" at the Fredericktown facility would be transferred to Universal Minerals & Metals, Inc. since we have contracted to purchase this plant.

Authorization #21459, superceded by 21846 issued August 20, 1954 cover the original licenses. Current authorization number is 24-3090-1.

Mr. Krueger has suggested that if information is necessary you might wish to contact him.

Should it be necessary for us to make application for licenses, please forward papers at your earliest convenience.

Sincerely yours,
UNIVERSAL MINERALS & METALS, INC.

Shirley McMillan
Assistant Secretary-Treasurer
