Dear Mr. Wright:

Unogen, Inc. of Charlottesville, Virginia was issued USNRC license number 45-23087-01 on 9/18/85. In reviewing this license I have found that the possession limit for Carbon-14 was erroneously listed as 65 mCi (item 8d.) instead of 125 mCi as requested in the license application of May 31, 1985. I assume that this is a clerical error and hope that it can be corrected without the necessity of a license amendment.

Please contact me if you need any further information to make this correction.

Sincerely,

Brian Copcutt, Ph.D.
