Rockville MD 20852
United States of America

Dear Susan

Ref : NRC License No. 21-23805-02E, OEM Marking

We have had requests from three of our customers to badge our Series 60A and XP95A range of detectors with their company name and logos. Included within these product ranges are two NRC licensed ionisation smoke detectors, the Series 60A conventional detector, part number 55000-250, and the XP95A analogue addressable monitor, part number 55000-550. I would like to request an ammendment to our NRC licenses to include details of these companies and their part numbers for our products. The table below lists the company, the product, the part number and the Apollo part number.

Company Name	Product	Company P/N	Apollo P/N
FIRECOM	S60A ion	FP600-250	55000-250
FIRECOM	XP95A ion	FP950-AI	55000-550
National Time & Signal	XP95A ion	D900-ION	55000-550
Garnewell	S60A ion	71034	55000-250

The details of each companies name and postal address are given on the copies of the product label drawings enclosed with this letter. In addition to the product label drawings, I have enclosed a copy of the drawings that detail the point of sale packaging label.

Can I ask you to review the enclosed information and ammend our NRC licenses accordingly.
Please advise me of the cost implications to Apollo at your earlist convenience. Should you
require any further information, please do not hesitate to contact me.

Yours faithfully
