Gentlemen:

This refers to the inspection conducted on April 21, 1958, of your activities authorized under Source Material License No. C-2210 dated January 9, 1958.

It was noted that the thorium-magnesium alloy was posted but did not include the radiation symbol as required by Section 29.205(a)(1) of Part 20 and that you indicated that this correction would be made. No other items of noncompliance have been noted as a result of this visit.

We appreciate the cooperation given to the AEC representative.
